

OIT-12010-86

27 FEB 1986

MEMORANDUM FOR: Chairman, Committee on Imagery Requirements
and Exploitation, Intelligence Community Staff

FROM: William F. Donnelly [redacted]
Director of Information Technology

SUBJECT: CAMS Security [redacted]

REFERENCE: Memo for D/OIT fm Chmn/COMIREX, dtd 5 Feb 86,
Same Subject

1. I would like to take a positive approach to bring CAMS into compliance with the DCI's "Uniform SAFEGUARDS for Protection of 'Critical Systems' Processing Intelligence Information," as opposed to requesting a waiver. [redacted]

2. The CAMS Vulnerability Study and resulting recommendations reflect our security concern for this "critical system," and our intentions to bring this system into compliance with the SAFEGUARDS. The short-term recommendations have been or soon will be implemented. The long-term recommendations, which will cost additional monies, are being planned and will be implemented when technology is available in the marketplace, i.e., automated data labeling. In the interim, we can reflect a degree of compliance with the SAFEGUARDS by implementing compensating security procedures and demonstrating that CAMS can enforce discretionary compartmentation. [redacted]

3. CIA will be required to submit a report on the status of our two critical systems by August 1986. In this report, we will reflect the degree of compliance with the SAFEGUARDS Criteria based on the positive actions taken by your staff. I am confident that this will satisfy the DCI's SAFEGUARDS requirements. I do not believe that the SAFEGUARDS should have a negative impact on CAMS in terms of the September 1986 deadline, and at this time, a waiver to the SAFEGUARDS is not required. [redacted]
